

Global Maintenance Engineer

Location: Herning

About Nel

Nel is a global, dedicated hydrogen company, delivering optimal solutions to produce, store, and distribute hydrogen from renewable energy. We serve industries, energy, and gas companies with leading hydrogen technology. Our roots date back to 1927, and since then, we have had a proud history of development and continuous improvement of hydrogen technologies. Today, our solutions cover the entire value chain: from hydrogen production technologies to hydrogen Fueling stations, enabling industries in their transition of green hydrogen, and providing fuel cell electric vehicles with the same fast fueling and long range as fossil-fueled vehicles - without the emissions.

About the Department and the job

At Nel Hydrogen in Lind, Herning, we are looking for a technical minded person but who has a keen interest in working with the commercial/administrative side of the Service Business.

As a Global Maintenance Engineer at the Nel Hydrogen, you will be responsible for managing our ERP system in terms of as built documentation and planned maintenance, to ensure that we utilize scheduled downtime with appropriate maintenance.

You will also work closely with your colleagues in service operations and product support to give the valuable experience you will gain during your job back to product development.

Responsibilities

- Create and implement maintenance plans.
- Understanding supplier maintenance recommendation for new and existing products in relation to inspections and required services.
- Supporting the planning and service team with predefining service orders.
- Point of contact for the Technology and Development department when it comes to new product introductions and its related service requirements.
- Structure and lead the component refurbishment program.
- Develop business cases for different replacement intervals

Your stakeholders will be:

- Our internal Nel Technology and Development department.
- Service component/spare part suppliers.
- Local Nel service departments in US/Korea

Qualifications

- Your educational background could be Production Engineer, Production Technologist, Mechanical Engineer, Marine Engineer or similar
- You hold general maintenance experience from a Service Business
- You are independent, flexible and have a personal "drive".
- You are, as a person efficient, and knows the importance of quality and punctuality.
- Very systematic and structured
- Good at keeping an overview within multiple systems
- Collaborative across the organisation
- Manage changing priorities well
- Maybe you have knowledge of the service modules in Navision or another ERP system.
- Communicates fluently in Danish and English, verbally as well as in writing

Equal opportunity employer

Nel is an equal opportunity employer, and all qualified applicants will receive consideration for employment regardless of race, colour, religion, sex, national origin, disability status, or any other characteristic protected by law. All employment is decided based on qualifications, merit, and business need.

Apply

To apply, please send your application and CV as soon as possible to recruitment@nelhydrogen.com Applications are processed on an ongoing basis.
